JEKYLL

& HYDE

Dr Jekyll is introduced just as he is on the brink of discovering the key to man's inner reality. One evening he experiments on himself and finds to his delight that his formula works. Unfortunately, his 'real' self turns out to be the monster Edward Hyde. Undaunted, Jekyll continues his researches, spending more and more time as Hyde, and gradually the horrifying character of Hyde begins to take over. Jekyll's fiancée and friends slowly become aware of the changes in him but are powerless to help. Jekyll himself finds it more and more difficult to keep Hyde at bay, and his initial delight soon turns into despair. When Hyde brutally murders one of the young maids, he realises his experiment has gone too far, and he takes the only possible course of action left to him. Set in 1851, this is Leonard H Caddy's retelling of the famous story by Robert Louis Stevenson.
